## Extraction Cabinets

### Air Extraction Hood and Spray Booth

Captures, filters and expels for a cleaner, healthier working environment within art, graphics, design technology areas, crafts and modelling and more...

#### Applications include filtration and extraction of:

Aerosol adhesives (glue booth for Spray Mount), aerosol lacquers and fixatives and airbrush sprays applied to artwork up to A2 size. A2 drawing boards can be placed into the hoods at an angle for efficient overspray capture.

The workstation hood also accommodates prototypes, models, ceramic parts, PCB's etc, placed onto the hood base to be sprayed, soldered, cleaned, glued, moulded, sanded etc.

All odours and gases are extracted to atmosphere.

Demonstrating adequate control of the risks to the health of employees, students and the general public, from dusts, powders, mists, fumes and vapours is the fundamental requirement of the Control of Substances Hazardous to Health (COSHH) regulations 2002 and 2004.

# BenchVent Extraction Cabinets

NOTE: These units exhaust air via flexi-duct to atmosphere.

For a cleaner, healthier working environment.

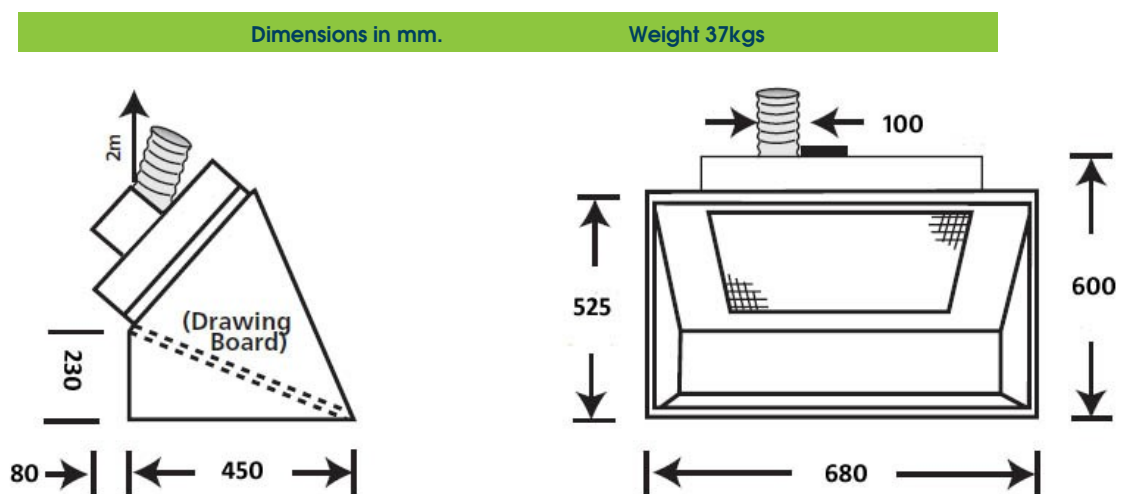

## Description

Steel construction finished in dove grey – fan/filter unit mounted onto hood enclosure - particulate filter - centrifugal blowers external rotor motor type, brushless, UL, VDE and CSA approved - sealed electrical wiring and switch, downstream of filter. Flexi-duct of 2 metres x 100mm dia.

## Operation

**All WS filtration and extraction systems carry a lifetime warranty, are quiet in operation and can be assembled in seconds. Place onto a desk, bench or trolley and then simply plug in and switch on.**

For artwork applications, standard A2 (drawing boards can be placed within the hood enclosure.) The boards fit at an angle for efficient overspray capture. 3D items, models, printed circuit boards etc. may be placed onto the hood base for spraying, cleaning, sanding, gluing etc. The Flexi-ducts can be fixed to a standard domestic vent or simply placed through a partially open window to facilitate portability or convenience.

## Specification

Model	Fan Motor* Spec	Air Volume	Ave. Air Velocity	Ave. Air Velocity	Noise Level
BV200H-D	230V 50Hz 105W	355m <sup>3</sup> /hr	0.6m/sec	0.25m/sec	58

\*110v 50 or 60Hz available on request

These cabinets are designed for studio / classroom / workshop cleanliness and for immediate operator protection whereby 'large' particulates (> 5 microns) are filtered out and 'fine' particulates (<5 microns) together with odours, gases, vapours and fumes within the hood enclosure are exhausted to atmosphere via the flexi-ducts. See BV660H-C or BV930H-C filtration or T660H-D and T930H-D extraction cabinets for higher specification filtration and extraction

Please contact BenchVent for advice on the choice of machine for any given situation.
